

Made in Sheffield, With Care and Passion

Give us a call

You can ring us **01142 677 635**. We open to take your call from 8am to 4pm, Monday to Friday.

If you like wildflower meadows, you're going to love Pictorial Meadows

A Pictorial Meadow is different to other meadows. We've spent over 20 years researching and rigourously testing our meadows to bring you more colour, a longer flowering season, and better support for biodiversity.

Green Estate is Pictorial Meadows parent company. As a not for profit organisation which uses landscape and heritage as a means of social change in one of the more deprived areas of Sheffield, the ongoing development of beautiful but affordable Pictorial Meadows landscapes has been an important element in delivering wellbeing. Pictorial Meadows has helped to change the physical, cultural and economic landscape around our neighbourhood and allows us to manage unique local parks on a very tight budget.

We are also very proud of our Sheffield heritage – just one more creative company thriving in a wonderful post-industrial city. As well as growing a lot of the species for the seed mixes ourselves, we ensure through stringent quality control procedures that every seed batch that we send to customers is of the highest quality and is as described. We continue to mix everything by hand as this allows us to get closer to the product and ensure that there has been no cross-contamination along the way.

We trial all our meadow mixes here in Sheffield and as we occupy one of the highest and most exposed part of this northern City we are pretty confident that if it grows here it will grow in your plot! Also our field testing in Scandinavia and Madrid has reinforced our satisfaction that we have products suitable for many more climactic zones and regions.

As a company we are very keen to spread the very unique Pictorial Meadows word to as many individuals and organisations as possible. We hold regular Open Days and Seminars at our Manor Lodge site and from 2016 we will be holding workshops across the UK at selected venues on a geographical basis. Wherever possible we always invite guest speakers to supplement our own team and try and make the sessions as practical as possible by using our own demonstration areas – both Parkland and meadow development plots. We are also regular presenters at professional seminars and our products are often showcased at major RHS Shows.
