### TURF MAINTENANCE MACHINERY

Reesink Turfcare, an official distributor for the sale, service and technical support of Toro commercial and grounds machines, has more than 30 years unbroken experience selling and servicing Toro professional turf machinery. As the global leader in turf machinery and equipment, Toro has been helping customers maintain sports venues, golf courses, amenity venues, public green spaces and commercial landscaping to the highest standards for over a century.

There's a Toro mower for every job, no matter how big or small, tough or awkward. Whether you're looking for a highly manoeuvrable zero-turn mower, or a robust, high performance out-front rotary; or perhaps a lightweight, compact triple or large output rotary that cuts long, tall grass down to size, Reesink Turfcare and Toro can help. And thanks to Reesink's strong commitment to customer service and flexible finance options, becoming a Toro user is achievable for all customers.

Alongside Toro machinery, Reesink Turfcare is an official distributor for two more innovative turf machinery and equipment brands. In both TYM compact tractors and fresh water management specialist Otterbine, there are reliable products to complement Reesink's wider turfcare portfolio perfectly.

In the TYM compact tractor range, customers can find the ideal companion to their attachments, such as a Toro ProCore aerator or a Toro gang mower. This worldwide brand provides capable compact tractors ranging from 25hp to 105hp and all featuring hydrostatic power-steering for smooth manoeuvrability, a tight turning circle and a four-wheel-drive front axle for greater traction.

Otterbine aerators and aerating fountains are a cost-effective way to keep water bodies healthy and clean, making them ideal for public parks and gardens, commercial landscaping, golf courses and hotels.
