Wildflower Turf is the original and leading supplier of wildflower turf products in the UK. Our Wildflower Turf products now has a wide range of uses in garden, landscape and built environment projects, and an impressive set of green credentials. Whether it be a traditional wildflower meadow, green roof, or river bank Wildflower Turf has established itself firmly as a significant contributor to the environment through its ecological benefits, aesthetic qualities and ability to absorb carbon.

Wildflower Turf is currently working with a number of organisations to help create wildlife friendly environments for species such as bees, butterflies, voles and slow worms to name a few. These organisations include Royal Botanic Gardens, Kew, The Environment Agency and Natural England, A Number of councils throughout the country have used the turf to improve parks and open spaces in their areas, and many more have made enquiries for future projects.

In addition the turf is specified by many architects for both green roofs and landscaping projects as a simple way of guaranteeing a wildflower meadow and the ecological benefits this brings.

Why Wildflowers

- Save the Bees
- Connect to outside spaces
- Increase or Replace Biodiversity
- Enable Wildlife Translocation
- Cost Savings
- Wildflower Roofs
